PROFESSIONAL SUMMARY

Results-driven Full Stack Engineer with 2+ years of experience as sole developer, architecting, building and deploying enterprise web applications end-to-end. Built production systems managing 11,000+ client records and 20+ staff users. Specialist in AI integration using OpenAI GPT and Claude API, reducing manual operations by 40%. Immediately available for new opportunities.

WORK EXPERIENCE

Full Stack Engineer

July 2024 – July 2026

Miracle Business Solutions (LMRA Registration Center) | Manama, Bahrain | Sole IT Professional

- Single-handedly architected, engineered and deployed scalable enterprise web applications from concept to production using PHP, JavaScript, HTML, CSS, MySQL and AWS.
- Built and maintained complete client management system from scratch managing 11,000+ client records and 20+ staff users, reducing manual workflows by 40%.
- Integrated AI automation using OpenAI GPT API for document scanning and automatic form filling, reducing manual data entry significantly. Built automated client communication system via WhatsApp, SMS and email saving 60% of manual follow-up time.
- Developed client location mapping using Leaflet and OpenStreetMap to analyse branch distances and provide clients with the best and most cost-effective route to complete their work at the nearest office.
- Built government compliance and document tracking system covering Sijilat, Immigration, CR/CPR renewals, work permits and passport expiry across all Bahrain government ministries.
- Developed WhatsApp Cloud API event automation system with live analytics dashboard tracking delivery, response and engagement rates.
- Managed and maintained entire codebase using Git and GitHub, ensuring version control, code reviews and repository management.
- Managed AWS cloud deployment and CI/CD pipelines with full SDLC ownership.
- Built SEO-optimized corporate website with automated lead capture and routing system.
- Introduced and trained staff on AI tools for emails, reports, customer responses and daily tasks.

Android and Product Developer Intern

March 2024 – May 2024

TuDime LLC (Remote) | California, USA

- Designed UI/UX screens and user experience for a mobile chat application using Android Studio.
- Collaborated with a remote intern team to deliver product milestones on schedule.
- Reported progress and deliverables directly to the Vice President in a US-based startup environment.

PERSONAL PROJECTS

AccountFlow | Business Accounting System | PHP, MySQL, JavaScript

- Multi-currency accounting platform supporting 40+ countries with VAT/GST/Sales Tax automation, AI-assisted invoice generation and real-time financial dashboards for freelancers and SMEs.

GitKart GlamHub | E-Commerce Platform | ReactJS, Node.js, Strapi, Stripe

- Responsive e-commerce application with Strapi CMS backend, Stripe payment integration and complete product and order management system.
